

## Test 1: The Evolution of Modern Governance

### Kelime Havuzu:

aligned | pillars | probe | prevalent | govern | insufficient | optimize | audacity |  
accountability | mismatch | intervention | trigger | surveillance | wary | implement | access |  
from scratch | perpetrator | hierarchy | resilience

In modern society, the systems that (1)\_\_\_\_\_ our daily lives are often hidden from view. While democracy is built on the (2)\_\_\_\_\_ of transparency and (3)\_\_\_\_\_, the rise of global (4)\_\_\_\_\_ networks has made many citizens (5)\_\_\_\_\_ of their own governments. Sometimes, there is a clear (6)\_\_\_\_\_ between the laws passed and the actual needs of the people. When public trust is (7)\_\_\_\_\_ due to corruption, it can (8)\_\_\_\_\_ widespread protests. In such crises, some leaders have the (9)\_\_\_\_\_ to ignore the problem, while others try to (10)\_\_\_\_\_ new policies to fix it. If the current system is found to be fundamentally (11)\_\_\_\_\_, experts may suggest rebuilding the administrative framework (12)\_\_\_\_\_. Ultimately, the success of any state (13)\_\_\_\_\_ depends on how well its goals are (14)\_\_\_\_\_ with the welfare of its citizens.

## Test 2: Human Nature and Technological Progress

### Kelime Havuzu:

diversity | longevity | waning | devoted | setbacks | revelation | lifespan | exposure | disrupt |  
temperament | endurance | manipulate | scarcity | recalibrate | augmentation | entity |  
interpret | conscious | enhance | fabricate | dismiss | fraud

The quest for (15)\_\_\_\_\_ has always been a central theme in human history, as we strive to extend the human (16)\_\_\_\_\_ through science. Modern medical (17)\_\_\_\_\_, such as robotic limbs or neural implants, aims to (18)\_\_\_\_\_ our natural abilities. However, as we become more (19)\_\_\_\_\_ of our biological limitations, we must also face the (20)\_\_\_\_\_ that technology can be a double-edged sword. While some researchers are (21)\_\_\_\_\_ to finding cures, others might try to (22)\_\_\_\_\_ data or even (23)\_\_\_\_\_ results to gain funding, which is a clear case of scientific (24)\_\_\_\_\_. Furthermore, constant (25)\_\_\_\_\_ to digital blue light can (26)\_\_\_\_\_ our natural sleep patterns. Despite these (27)\_\_\_\_\_, the human spirit's (28)\_\_\_\_\_ and calm (29)\_\_\_\_\_ allow us to (30)\_\_\_\_\_ our expectations and continue to innovate in a world of resource (31)\_\_\_\_\_.

### Test 3: Communication and Social Reality

#### Kelime Havuzu:

attachments | haunts | cue | scarce | intriguing | resilient | accelerate | benign | outweigh | undermine | innovation | evolve | consumption | due | expand | comply with | proliferation | projection | disinformation | resurrect | render | attribute | intertwine | agency | reinforce | manifest | autonomy | self-fulfilling | generative | elevate | ambiguity | entanglement

In the age of AI, the (32)\_\_\_\_\_ of fake content has created a complex legal (33)\_\_\_\_\_ for tech companies. New (34)\_\_\_\_\_ models can create realistic images and text, which may (35)\_\_\_\_\_ traditional journalism obsolete. This trend can (36)\_\_\_\_\_ the spread of (37)\_\_\_\_\_, making it harder for people to (38)\_\_\_\_\_ what is real. Such technology can (39)\_\_\_\_\_ existing social biases and even (40)\_\_\_\_\_ as a (41)\_\_\_\_\_ prophecy where people only believe what they already feel is true. While the benefits of (42)\_\_\_\_\_ often (43)\_\_\_\_\_ the risks, we must be careful not to (44)\_\_\_\_\_ the truth. To protect our cognitive (45)\_\_\_\_\_, we must (46)\_\_\_\_\_ stricter regulations. Our digital and physical lives now (47)\_\_\_\_\_ so deeply that a single social media (48)\_\_\_\_\_ can act as a powerful emotional trigger. Even though some old cultural habits are (49)\_\_\_\_\_, we can still (50)\_\_\_\_\_ lost traditions through digital archives to (51)\_\_\_\_\_ our collective identity.
